THE bill to reorganize the congressional districts in Indiana is so gross an ourrage that ten democratic members of the legislature voted against engrossing it.

If the people of Chicago yearn for polithe people of Chicago yearn for politicial reform and the reign of honesty in municipal affairs, let them show wisdom by electing Robert Lincoln to the Mayor-

THE California Legislature had been in ession forty days-sixty days is the limit fixed by the constitution-before any leg- Welsh. But for the poor fellow's soul I islation had been enacted, except a bill to shall ever pray, and in the meantime try pay for a horse that fell through a wharf to make our copy better and and was killed.

THERE is no gainsaying the fact, and it is a fact, that there is no better field than New Mexico for the investment of money, with a view to early and certain returns. This applies more particularly to stock growing and careful mining investments.

DR. TALMAGE intimates that the New lersey legislature indulges in too much whisky and profanity, and not enough in serious work. Brother Talmage clearly mistakes the mission of the body which he maligns. It is to furnish a frightful example, and not to set a model.

CLEVELAND is credited with saying: "I think it is wise to retain the friends that came to our support in the last campaign. It is a question in my mind whether the solid south can be maintained by the democrats, and by inaugurating a liberal and progressive policy, we may be able to gather many recruits in northern and western states."

KINGSTON, Feb. 25, 1885 .- EDITOR ournal.-As your readers may be ware Kingston is named after the Iron King mine, one of the first locations made this section, and the best developed, if not the richest mine in camp. So confident have the owners been of the value of their property that they have erected ine smelting works on the edge of town, about a mile from their mine. The owners of the outfit are New York parties. Their representatives here are nearly, it not quite, all German. So much so that he miners, in their expressive way, speak of the "Dutch outfit" in talking of the

Whatever may have been the expectaions of the company when putting up heir works, they have certainly not been calized. Parties who are acquainted with such things pronounce the sancter to be one of the finest in the country. Yet they are not running, and have not been running, more than one-third of the time since erection. Lack of fluxing ma-terial said to be the cause. Lead has been hauled and shipped from every sur-rounding camp, when it could be obtain-ed, and I see by THE JOURNAL that ore is being shipped from the Organ mountains to the Kingston smelter that matter, but the lead is wanting, although the galena ores are thought to be abundant just over the range, some five or six miles away, but there does not seem to be sufficient enterprise to build a road over there, and let me whisper in your ear, that lack of en-

Mr A. A. Wise, of Las Vegas, who is interested in some valuable mines here, and W. W. Maxwell, an old-timer of this place, talk of opening a real estate office here, which is much needed, if carried on by pushing and enterprising men, which both Wise and Maxwell seem to be.
